About FTK 3

THE INDUSTRY-STANDARD COMPUTER FORENSICS SOFTWARE USED BY GOVERNMENT AGENCIES AND LAW ENFORCEMENT AROUND THE WORLD

Forensic Toolkit® (FTK®) is recognized around the world as the standard in computer forensics software. This court-validated digital investigations platform delivers cutting-edge computer forensic analysis, decryption and password cracking all within an intuitive and customizable interface. FTK 3 is built for speed, analytics and enterprise-class scalability. Known for its intuitive interface, email analysis, customizable data views and stability, FTK lays the framework for seamless expansion, so your computer forensics solution can grow with your organization's needs. Forensic Toolkit 3 is now the most advanced computer forensics software available, providing functionality that normally only organizations with tens of thousands of dollars could afford. However, we are committed to making our technology available to all investigators and analysts, whether they are in law enforcement, education, a government agency, a Fortune 500 corporation, or performing digital investigations as computer forensics service provider.
